

Dr. Daryl Yorek, DDS, MS

106 S. 131st

Tacoma, WA 98444

(253) 537-5565

CONGRATULATIONS

Upon Completion of Phase I Orthodontic Treatment

Patient Name: _____

We are so excited you have completed your first phase of orthodontic treatment. In most cases, after your braces are removed you will receive either fixed banded retainers (only removable by Dr. Yorek) or removable retainers to maintain your new smile and prevent relapse from occurring. It is very important to follow all care/eating instructions given to you by Dr. Yorek to prevent loss or damage to your retainers. If loss or damage occurs, a replacement retainer will be available to you at an additional cost.

Dr. Yorek will continue to monitor your child's orthodontic development every 6 to 12 months. At these appointments he will also check your child's retainer(s) to ensure proper fit. These appointments are very important as they give Dr. Yorek insight as to when your child will be ready to begin their second phase of orthodontic treatment. At these appointments Dr. Yorek will check your child's retainer(s) to ensure proper fit.

I agree to have my child's braces/appliances removed to complete Phase I orthodontic treatment. I understand that future orthodontic treatment (Phase II) most likely will be needed to complete my child's smile and will be available at a later date for an additional cost.
